

My Name is Robert Snyder and I urge the committee to **support** Senate Bill 46

And I give **Ten reasons to give the unborn child a compelling state interest:**

- 1) Our founding fathers recognized LIFE, liberty and pursuit of happiness as "unalienable rights"
- 2) They sought to "secure the blessings of liberty to ourselves and our POSTERITY"
- 3) A child in the womb is depending on oxygen from day one.
- 4) **The child has a heart beat at day 18 and pumping his or her own unique blood type on day twenty one.**
- 5) **He or she has ten fingers and ten toes and all major body organs by ten weeks when several moms still aren't quite sure if they are with child yet.**
- 6) With three and four dimension ultra sound available and instructional videos made during the actual procedure, several abortion doctors and nurses are leaving the field due to the inhumanity involved.
- 7) Our population is becoming lopsided, elementary schools closing and consolidating, entry level jobs have a diminishing work force pool of young adults, social security payees are relying on less payers.
- 8) The entire 6 billion people on planet earth could fit into Yellowstone County and do Jumping Jacks and Montana of all places is proof the world is not over crowded.
- 9) **The entrance of a child into a relationship is one that through the ages has brought sacrificial responsibility out of even young Parents, a task and common goal that has the power to knit parents together in the awkward years as they truly fall in love and become a family, the building block of all other desirable institutions.**
- 10) This is not an exhaustive defense by any means, but finally on my short list - **Protecting the unborn child will also put a stop to the abuse on women, pressuring them with fear or deception, that they bear the scars ... I'm going to say it ... for MALE irresponsibility in the continuation of the abuse of women and unborn children.**

Hear their cry ... Let us speak.
